PROFILE

Mid-Level Front-End Engineer using React & Next.js, with 2+ years of experience delivering scalable and high-performance applications for clients across multiple countries and industries, ranging from startups to large-scale.

EDUCATION

Ain Shams University

Cairo, Egypt

Bachelor of Computer and Information Science

WORK EXPERIENCE

X-PAY

Cairo, Egypt

Mid-level FrontEnd Engineer

Sep 2025 – Present

- Contributed to one of Egypt's largest fintech projects, supporting a platform handling 10M+ EGP in monthly transactions.
- Developed production-grade, interactive X-Pay documentation using Fumadocs with integrated OpenAPI support.
- Implemented real-time API testing and interactive exploration directly within the documentation.
- Integrated PostHog analytics to track user behavior and product performance insights
- Optimized user engagement across key flows through data-driven improvements.

Almedad Soft

Libya

Mid-level FrontEnd Engineer (part time)

Jul 2025 – Present

- Contributed to building Libya's Zakat platform serving 8M+ citizens.
- Managed and monitored millions in financial transactions within the Zakat and charity system.
- Developed a centralized dashboard to manage 40+ Zakat and charity offices.
- Built the Libyan Ministry of Education platform supporting 6 different user roles.
- Designed and developed a full-scale Hotel Management System including Front Office, Back Office, Housekeeping, and POS modules for hotels in Libya.

RHYION SYSTEMS

Cairo, Egypt

Mid-level FrontEnd Engineer

Apr 2024 – Sep 2025

- Suppliex — Multi-Vendor E-Commerce Platform

- Built the first platform in the MENA region to unify suppliers, shop owners, and consumers in a single marketplace.
- Developed and maintained the frontend of a multi-vendor e-commerce platform using Next.js.
- Designed and implemented role-based dashboards supporting 7+ distinct user types.
- Integrated RESTful APIs to ensure reliable and scalable client-server communication.
- Integrated payment and shipping services within a secure and structured frontend architecture
- Applied server-side rendering (SSR) and lazy loading to improve performance and user experience.
- Improved SEO through structured metadata and optimized asset handling.

- East to West (E2W) — B2B-to-C Cross-Border E-Commerce Platform (Node.js, **Next.js 16**, **TypeScript**, **Stripe**)

- Built and optimized 29 responsive pages across three separate portals using Next.js 16 and TypeScript, implementing dynamic product catalogs, localized currency displays (CNY/AED/USD), and region-based storefront experiences for China and Dubai markets.
- Developed advanced e-commerce UI flows including multi-step Stripe checkout, bulk pricing interfaces, inventory reservation countdowns, and real-time order status tracking with seamless API integration and state management.

- Qentry — Smart QR Guest Experience & Event Management Platform (**ASP.NET Core**, **WhatsApp API**)

- Developed a scalable multi-tenant frontend dashboard with secure account-based data isolation, enabling corporate clients and PR agencies to manage guest lists, invitations, and event analytics through responsive and intuitive interfaces.
- Implemented real-time QR attendance monitoring, RSVP management flows, Excel upload handling, and exportable reporting dashboards with live API-driven updates and optimized UX for large-scale events.

LeadBull LLC

Canada

FrontEnd Developer

Sep 2023 – Oct 2024

- Collaborated within a cross-functional team at a large Canadian multinational company.
- Contributed to platforms supporting multi-country operations and diverse market requirements.
- Designed and developed a full-featured ERP system using React.js.

Information Technology Institute (ITI)

Cairo, Egypt

FrontEnd Internship

Jul 2023 – Aug 2023

- Applied **HTML** , **CSS** , **JS** , **OOP** principles, React js and Projects.

PROJECTS

AI driven De-novo drug discovery – Graduation Project

Sep 2024 – May 2025

- Achieved (A+) and Developed an AI-driven De-novo drug discovery platform leveraging machine learning to design novel drug-like molecules with optimized pharmacological properties.
- Implemented molecular generation, evaluation, and optimization workflows integrating cheminformatics libraries and molecular docking simulations.
- Enabled target-specific drug design by allowing selection of the diseased protein, generating AI-suggested drug molecules with both SMILES notation and 3D molecular structures for further analysis.
- Delivered a high-impact graduation project recognized with an A+ grade for innovation, technical execution, and scientific accuracy.

SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, Python, C#, C++, Java, SQL, HTML5, CSS3.

Concepts and Technologies: Data Structure, Algorithms, OOP, Design Patterns, Problem-Solving, Git, GitHub, RESTful APIs, React , Next , Angular, Tailwind, Bootstrap , Shaden UI ,material UI, Internationalization (i18n), Machine Learning , WebSockets .
